**Please explain the reasons for your response**

Q1. Which of the following best expresses your view of the proposed Bill?

Period poverty is a serious issue affecting women all across not just Scotland, but the whole world. Caledonian Women believes that access to sanitary products is essential, and should be a human right.

## Page 8: Universal provision of sanitary products

Q2. Do you think a universal, card-based system (modelled on the c-card system for free condoms) would be an effective means of providing sanitary products for free to those who need them?

Yes

Q3. Which of the following best expresses your view in relation to a card-based system?

The card should be available to anyone; card-holders should have unlimited access to free sanitary products

Q4. Do you have a view on which locations would be most suitable for dispensing free sanitary products (e.g. GP surgeries, pharmacies, community centres, health clinics)?

Pharmacies, GP surgeries, health clinics and educative centres would be the most suitable for dispensing free sanitary products.

## Page 11: Schools, colleges and universities

Q5. Do you agree that there should be specific obligations on schools, colleges and universities to make sanitary products available for free (via dispensers in toilets)?

Yes

**Please explain the reasons for your response**

Universities, schools, and colleges should ensure free access to sanitary products. This would ensure girls are able to attend classes whilst menstruating, comfortably and with dignity.

## Page 12: Personal experience (questions 6 and 7 are for individual respondents only)

Q6. Have you ever struggled to access or afford sanitary products during menstruation? (e.g. financial barriers, unexpected circumstances, health issues)

Yes, frequently

Q7. If sanitary products were available for free, which of the following would apply to you?

I would expect to claim free products occasionally

## Page 18: Sustainability

Q12. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impacts?

Yes

**Please explain the reasons for your response:**

Yes, because it seems likely that only those with little to no access to sanitary products, and those struggling to afford them will take advantage of the free products.
